Join us for the twenty-third annual Adams Lecture in Humanities with Dr. Jason De León, Assistant Professor of Anthropology, University of Michigan and Director of the Undocumented Migration Project.

Human smugglers have received little attention from social scientists, despite being crucial to the social process of undocumented migration in Latin America and beyond. In this presentation De León will discuss an ongoing photoethnographic project focused on the violent day-to-day lives of Honduran smugglers who profit by moving Central Americans across Mexico. He will highlight both the complicated and often short lives that these individuals live and discuss the ethics of trying to visually represent their experiences.
